

Explanation

This section lists the average prices you paid for your medications. Please review the list for accuracy and advise the Ourlife nurse practitioner of any discrepancies.

These alternative medications are options for less costly drugs that physicians often prescribe in place of the medications you are taking now. Only your physician can determine if these choices are right for you.

There may be multiple alternatives for each medication. The pricing and quantities in these columns represent the average amounts paid by all employees. They may vary from the price you paid or the quantity you filled.

The co-pay savings is calculated at the rate of 12 months of a prescribed medication. The calculation is based on the alternative medication that offers the greatest cost savings.

This is your total potential annual savings.

Follow these steps to explore the possibility of saving money on your prescription drugs:

Apr 20, 2011 Date John Smith Name
 123 Main Street, Savannah GA 31401 Address
 Hospital Name _____ Phone# _____ Corp. Name & Address _____

 Physician approval is required for all prescription strength drug options and dosages. Inform your Doctor of the prescription and over the counter medications you use, including vitamins, minerals, herbs, and drugs prescribed by other doctors. Do not start taking a medication without telling your Doctor. This information uses approximate dosages for comparison purposes. Your Doctor will select the appropriate dose based on your condition. We encourage you to take this list with you on all physician visits and discuss the options suggested. Medication prices are approximate and may vary from drugstore to drugstore.

Instructions

1. **CALL** to make an appointment with Ourlife or your doctor.
2. Make sure to **DISCUSS** this medical report with your doctor.
3. Ask your doctor to make any appropriate changes to **SAVE YOU MONEY.**
